

Typical Veneer Stain Choices

These are popular stain formulas that give you a starting point to describe the look that fits your vision.

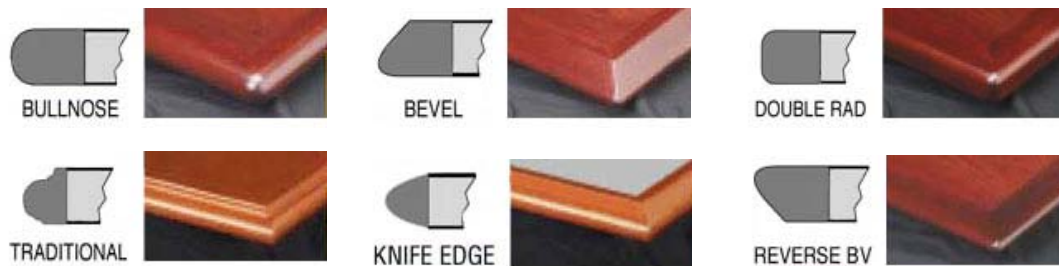

Stain to Match Program

Our unique process lets us develop custom colors through our "Stain to Match" program. If you have a color to match, we will match it and send it back for your approval. Use any laminate chip, for example. Let us take the guesswork out of the equation for you.

Our finishers apply all stains and topcoats by hand using their experience to establish color consistency on all products. We use low VOC, solvent-based coatings and UV water-base coatings to meet your requests.
