

## Adjustable Height Pedestal Tables

### Brainstorm tops

The Cirrus floating balance adjustable height tables feature a pneumatic assist pedestal column, balanced for 44 lbs. This force balances the top to make lifting and lowering the top smooth and easy.

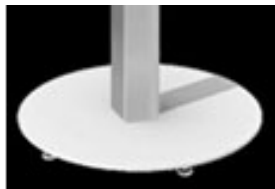

Position the top anywhere within a range of 26 to 43.7 inches, a range of 17.72 inches giving full ADA compliance access to all users. The sure grip cable release is designed to operate safely without unintentional release. Smooth motion with no-bounce stopping.

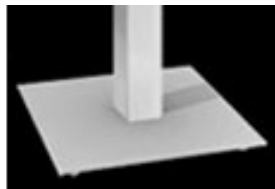

The Brainstorm Top gives four working sit/stand table positions where up to four laptops can be used together. The top is finished in tough 3D Thermofoil with contoured edges, or high pressure laminate with 3mm PVC edge trim, available in your choice of colors.

# Adjustable Height Pedestal Tables

## TriCloud Tops

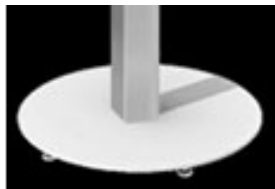

The Cirrus floating balance adjustable height tables feature a pneumatic assist pedestal column, balanced for 44 lbs. This force balances the top to make lifting and lowering the top smooth and easy.

Position the top anywhere within a range of 26 to 43.7 inches, a range of 17.72 inches giving full ADA compliance access to all users. The sure grip cable release is designed to operate safely without unintentional release. Smooth motion with no-bounce stopping.

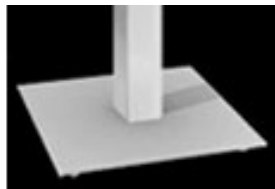

The Cirrus TriCloud is so named because it is shaped for up to three laptop users who can float to any common stratosphere together. The work surface is highly scratch resistant. You may specify the top to be made of MDF, finished in laminate and edged with semi-rigid PVC, or with contoured edges finished in 3D Thermofoil.
