

Power for Collaboration

THE DRIFTER™

The Drifter is a unique power and charging hub which offers users additional opportunity to stay connected to their devices continuously throughout the day. The Drifter's portable design allows it to be easily repositioned from one area to the next, making it ideal for an array of spaces spanning office, education, hospitality, and healthcare environments.

THE DRIFTER FEATURES:

- **ENHANCED USB CHARGING TECHNOLOGY**
Upgraded 3.0 USB ports now charge your favorite devices while in use.
- **360° ACCESS TO POWER AND USB CHARGING**
A standard three prong plug brings connectivity to one Tamper Resistant power receptacle and two USB ports on each of the three sides of the unit for a total of three power and six USB.
- **BUILT-IN CORD MANAGEMENT**
Integral feet offer stability and double as cord management for when the unit is not in use.
- **TAMPER RESISTANT RECEPTACLES**
Spring loaded shutter mechanism helps keep foreign objects out adding an additional level of safety.
- **EASE OF INSTALLATION FOR NEW AND RETROFIT APPLICATIONS**
The Drifter is a stand alone unit that can be easily added to new or retrofit applications without the need of cutouts in the furniture.
- **MOUNTING ACCESSORY KIT**
Kit is included and used to secure the Drifter to the work surface when mobility is not desired.
