SMARTDESKS[®]

where design meets technologysm

iLid® touch SMARTdesks

Make the most of your lesson plan with multi-use classroom freedom.
All-in-ones • Touch screen interface • PCs • Notebooks, Text Books and Paper

The iLid® is intuitive to use. When computers or all-in-ones are needed, just open the iLid as easily as opening a laptop.

Touch screens may be used with confidence that gestures made on the screen will not slide the computer off its stand and send it crashing to the floor.

When it's time to put the screens down and focus on textbooks and note paper, iLid makes the conversion in seconds.

In use, screens are presented below the horizon line for an unobstructed view of white boards, projection screens, instructor and fellow students. Wiring clutter is kept organized and out of sight. If CPUs are used, they are stowed for convenient access without limiting knee space.

Typical dimensions: (W x D x H)
Single: 32 x 28 x 30 Desk, 36 x 26 x 29 Table
Double: 60 or 72 x 26 x 30 Desk
72 x 26 x 29 Table

Multi-use Classroom Freedom!

With iLid closed, the entire desktop is open for use as a standard classroom. In seconds, iLid converts the space to a computer lab. Quickly. Quietly.

Available in singles and doubles for greater economy. Choose HorizonLine® Table style in thermofoil finish and comfort contoured edges (shown) or in laminate top surface with 3mm PVC edges.

Textbooks and technology work together or separately, side-by-side. Keyboards may be used on the desktop with internal stow tray (shown) or with retractable keyboard tray, which extends the usable working space on the desktop.

VESA Compatible Displays Required

While most PCs have VESA compliant mounting structures, some all-in-ones do not. Display stands are removed to expose the VESA mounting screw locations at 100mm or 75mm square. The iLid's quick release mount makes it possible to detach the monitor for easy access or placement on the lap, if preferred.

PC shelf provided for convenient storage.

Trimmed with aluminum edge for designer appearance and rugged performance.

Desks have designer contoured panels with bases that permit use with Connectrac power systems.

Desks and tables feature

- FC707 Power Strips with 3 110VAC and one USB power per user
- Neatlinks Wire Manager
- Optional Locking Casters for mobility

- Keyboard and mouse stow here, within easy reach.
- Optional EZ Cinch CPU holder adapts to small form factor or 75 pounds, max.
