

LEED CONTRIBUTIONS SUMMARY

MATERIALS AND RESOURCE CREDITS

Credit 2 – Construction Waste Management – Divert 50% or 75% of construction debris from landfills. Products are packaged in corrugated cardboard boxes and inserts which are recyclable and can reduce landfill disposal. **Credit 3.2 – Materials and Reuse–Furniture & Furnishings** – Use 30% refurbished or salvaged furniture. Worksurface products are made from durable cold roll steel, brushed stainless steel or brushed aluminum and are designed to be easily removed and reused. Our telecom Plates are easily interchangeable and upgradeable to accommodate changing requirements.

Credit 4 – Recycled Content – Use materials with recycled contents of 10% (1 point) or 20% (2 points) Post Consumer + 1/2 Pre-Consumer

ECA PRODUCT	FINISH	PRE-CONSUMER	POST CONSUMER	TOTAL % QUALIFYING TOWARD LEED (POST CONSUMER + 1/2 PRE-CONSUMER)
