MARINA[™] HDMI

Marina™ HDMI

COLLABORATIVE MEETING TECHNOLOGY

The Marina is an all-inclusive, self-contained, collaborative meeting solution. Sliding doors offer easy access to a combination of power receptacles, customizable telecom plates and USB charging ports for keeping your favorite devices charged, even while in use. High definition HDMI audio visual components are packaged neatly inside the unit, and allow for up to 4 users to share ideas on one screen with the simple push of a “Show Me” button.

THE MARINA HDMI PROVIDES:

- Non-proprietary design to allow it to be used across a variety of furniture lines in both new and retrofit applications.
- Flexibility in design – All components are stored in a technology bay which is easily affixed to the underside of the table. A separate grommet with sliding doors is dropped in from the top and available in a variety of finishes or be creative and design your own.
- Integral cable management – Recessed storage compartment provides ample space for cabling when not in use keeping the workspace clutter free and any adapters stored.
- Easy set-up – once installed in the table, simply connect the Marina into a power source and monitor and you are ready to share. No additional software installation is required.

Marina comes standard with a Graphite Gray Technology Bay and a variety of grommet finishes including Black, Gloss White, Brushed Clear and Black Aluminum, and Silver Pearl.
