

Quark2

How many ways can you use a
sit-stand, mobile laptop table?

Now...

SMART*desks*[®]

Qstar2

...multiply by 5

Quark2 gives you the freedom to sit, stand, move, turn, align, break-out, connect to power, connect to data, work alone, work in groups, lead, follow, collaborate...ands that's just for starters.

Quark's original concept has become even more streamlined. Its base appears to float like a hover craft on its stable arrangement of five lockable carpet casters, its lines echo the elegant shuttlecraft top. The height adjustment is a simple ratchet you lift to the desired height from sitting to standing in twelve one-inch increments. You can specify the power and data fixture as desired from SMARTdesks' wide range of options. The WireWonder™ cord manager is standard to keep your clutter under wraps.

The coordinating Qstar2 docking station features the same height adjustment ratchet with a top that lets you conference with up to five Quark2 stations.

Quark2 Table Q2L-3533VH-E2RA-CXX

Ratchet lift center support adjusts the height 9.45" (finished height 30.375" to 39.875"), includes:

- locking casters
- one Cove with 1 power receptacle, 2 USB charging ports (clamp mount-tightens with thumbscrews, 108" (9') cord)
- one 8" WireWonder Cable Manager
- top surface finished with high-pressure laminate with PVC edge trim (semi-rigid)
- bottom panel and height adjustable column powder coated in silver.
- 35"W x 33" D x variable height.

Cove has 1 power 2 USB power outlets, 9' cord, clamp mount with thumbscrews.

Quark2 Table without Cove Q2L-3533VH-E2RA-XXX

Qstar2 Mobile Docking Station

Q2SL-4644VH-E2RA-XXX

Ratchet lift center support adjusts the height 9.45" (finished height 30.375" to 39.875"), includes:

- locking casters
- five scalloped areas for docking Quark2 tables
- top surface finished with high-pressure laminate with PVC edge trim (semi-rigid).
- bottom panel and height adjustable column powder coated in silver.
- 46"w x 44"d x variable height

8" WireWonder Cable Manager, installs under Quark2's bow.

Left Dock: use with center for 4

Center Dock: use for 2 stand-alone

Right Dock: use with center for 4

Quark2 Wall-Mounted Docking Stations

Organization for independent study

Up to three section designs can be used together to organize and dock groups of two Quark2. This gives a dressed place for wire management, power distribution and optically pleasing placement and spacing for the Quark2 workstations.

Figure your available wall space, then center one unit at 79", two units at 163", or three units at 242" to organize desired placement. For even more extension, lefts nest with themselves left of center; rights do, as well, right of center. Top surface finished with high-pressure laminate with PVC edge trim (semi-rigid).
